

SOIS E-Commerce Platform

Phase 1 MVP Development Scope Document

1. Project Overview

SOIS aims to establish a premium online presence for its Sterling Silver Jewelry brand through a Direct-to-Consumer (D2C) e-commerce platform.

The objective of Phase 1 is to launch a production-ready e-commerce website that enables customers to discover products, place orders, make secure payments, and manage their purchases.

This phase focuses on building the core online selling experience required for the brand launch.

2. Phase 1 Objectives

The Phase 1 platform will enable:

- Customers to browse SOIS jewelry collections
 - Customers to view detailed product information
 - Customers to purchase products online
 - Secure online payment processing
 - Order management and tracking
 - Admin management of products, inventory, and orders
-

3. Customer Website Features

3.1 Homepage

The homepage will include:

- Premium hero banner section
 - Featured collections
 - New arrivals section
 - Best-selling products
 - Brand story section
 - Customer reviews/testimonials
 - Contact information
 - Social media links
 - Footer navigation
-

4. Product Catalogue

Product Listing

Customers can:

- View all products
- Browse products by category
- Search products
- Filter products
- Sort products

Product Categories

Initial categories:

- Rings
- Earrings
- Necklaces
- Bracelets
- Anklets
- Gift collections

Product Filters

Phase 1 filters:

- Category
 - Price range
 - Availability
 - New arrivals
 - Best sellers
-

5. Product Detail Page

Each product page will contain:

Product Information

- Product name
- Product images
- Product description
- Product specifications
- SKU
- Pricing details
- Discount pricing (where applicable)
- Sterling silver details
- Product care instructions

Customer Actions

Customers can:

- Add product to cart
 - Buy now
 - View related products
 - Share product
-

6. Customer Account Features

Customers can:

- Register account
- Login

- Manage profile information
- Add/manage delivery addresses
- View order history
- View order details

Guest checkout support will also be available.

7. Shopping Cart

Customers can:

- Add products to cart
 - Update product quantity
 - Remove products
 - View cart summary
 - Apply discount coupons
 - Proceed to checkout
-

8. Checkout System

Checkout flow:

Cart

Customer Details

Delivery Address

Payment

Order Confirmation

Features:

- Guest checkout
 - Registered customer checkout
 - Address selection
 - Order summary
 - Secure payment process
-

9. Payment Integration

Payment gateway integration will support:

- UPI payments
- Credit cards
- Debit cards
- Net banking
- Wallet payments

Recommended gateway:

- Razorpay

Payment gateway account setup and transaction charges will be managed by SOIS.

10. Order Management

Customers can:

- Receive order confirmation
- View order status
- Track order progress

Order statuses:

- Order placed
- Payment confirmed
- Processing
- Shipped
- Delivered

- Cancelled
-

11. Shipping Integration

Shipping integration will include:

- Shipment creation
- Tracking information
- Delivery status updates

Shipping partner account and shipping charges will be managed by SOIS.

12. Admin Management Panel

Product Management

Admin can:

- Add products
- Edit products
- Remove products
